

MECCANO

MECCANO

The beauty of Meccano is that it can mean so many different things to so many different children and adults of all ages - a bright and colourful introduction to the world of construction for the under fives, a dynamic building system for the imaginative schoolchild or a superbly versatile medium for the prototype engineer. Many great and inventive ideas have originated from this product but it also continues to give hours of fun. Why not read on and see what it can offer you.

MECCANO

Junior

SERIES
SETS A+B

uitable for children four years and upwards. A delightful and colourful introduction to the basics of construction. Simple pictorial illustrations enable the child to build a variety of models. Alternatively, the numerous plastic pieces enable the young child to stretch their imagination and create their own ideas. The plastic pieces are interchangeable with Metal Meccano once the young model maker progresses to the Beginners Series.

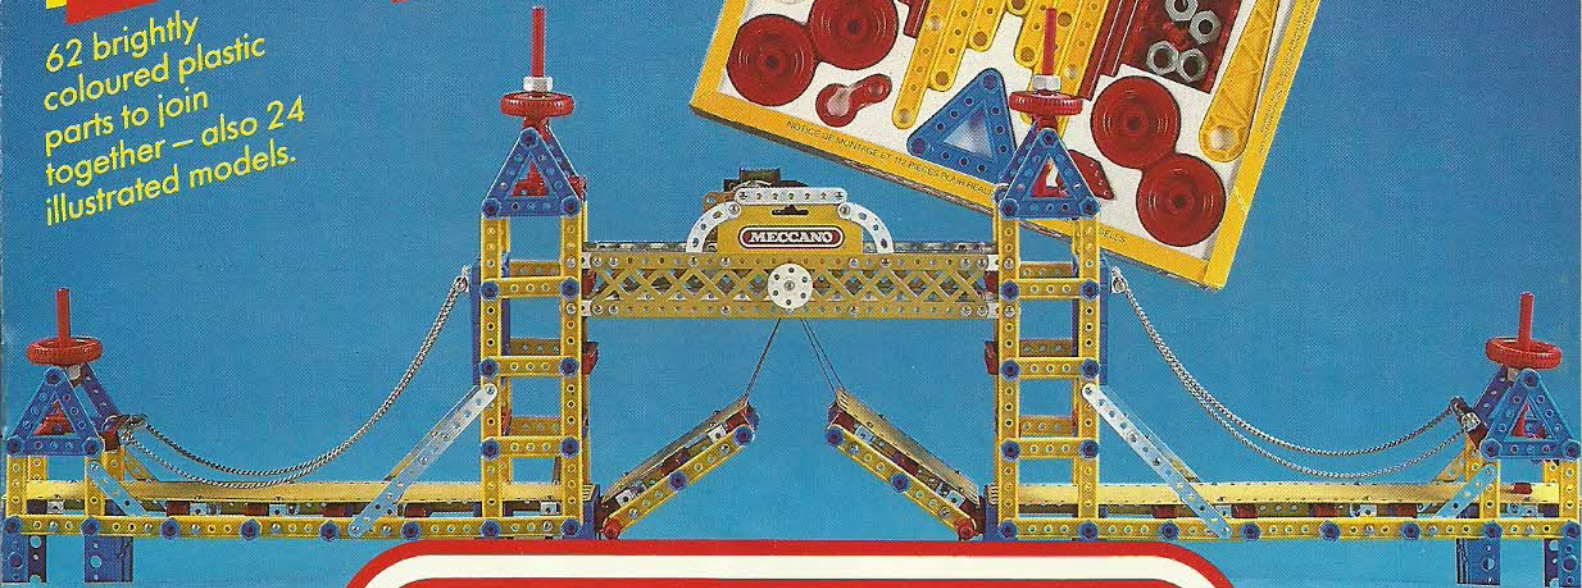

Set
A

62 brightly coloured plastic parts to join together – also 24 illustrated models.

Set
B

The 112 plastic pieces can build up to 42 working models all with detailed colour illustrations!

MECCANO

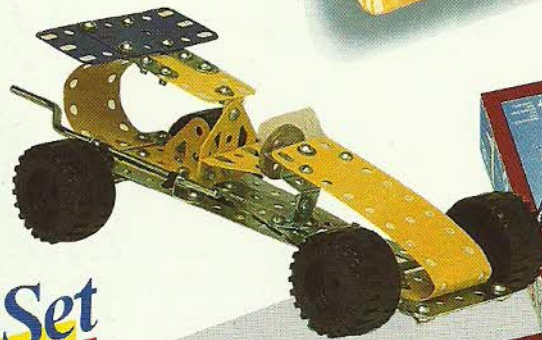

MECCANO

Beginners

SERIES

SETS
1-4

A fabulous introduction to the world of Metal Meccano. For all ages from six and upwards. You can build a variety of working models from the pictorial illustrations or even more exciting – create and then build your own designs. Sets 2, 3 and 4 include an electric motor.

Set

1

Set 1 – Build 15 working models from 180 separate parts – a perfect introduction to the basics of Meccano.

Set

2

Set 2 – With Electric Motor* The start of the motorised sets. 230 parts will build the 27 illustrated models. Excellent value for money.

Set

3

Set 3 – With Electric Motor* Don't restrict yourself to the 39 illustrations – the 290 parts will enable you to create your own models as well!

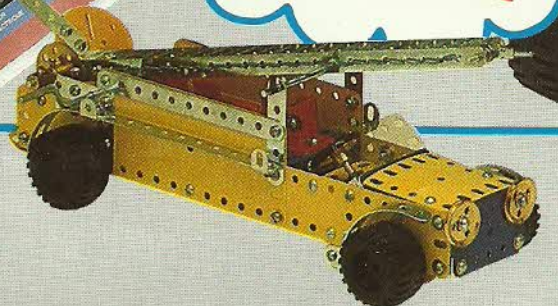

Set

4

Set 4 – With Electric Motor* You are on your way to becoming an Enthusiast! – 51 illustrated models from 380 parts.

**WITH
ELECTRIC
MOTOR**

NEW

To assist the younger Meccano Modeller we have included in the Beginners Series modifications to the nuts, bolts and associated tools. To make it easier to locate, tighten and loosen bolts they now have 'allen' style heads. In addition we have included the requisite allen key and have also moved to a four sided nut to assist the model builder. The Meccano spanner has also changed as a result. All in all no real change to the Meccano system but much easier for the young Meccano engineers to use.

MECCANO

*Batteries are not included – four 1.5v R14's or equivalent are required.

MECCANO

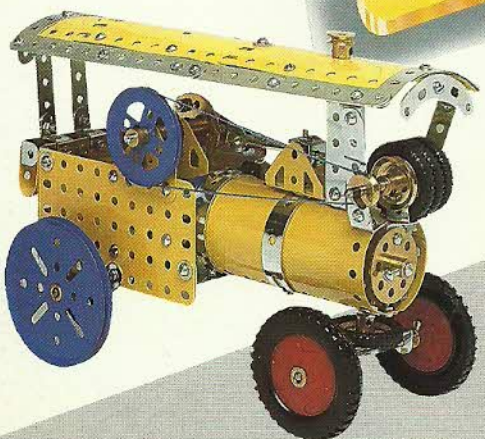

Enthusiasts

SERIES

SETS
5-10

With these sets you are looking to become a graduate in the "Mechanics of Meccano". The Enthusiasts Series best illustrates the scope, versatility and inventiveness of this wonderful hobby.

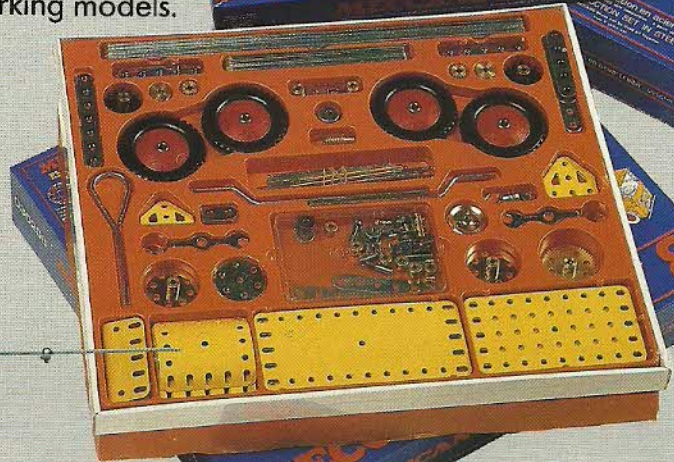

Set 5

Set 5 — Your first Enthusiast Set — 410 parts and 62 working models.

Set 6 — Even more variations — the detailed illustrations show 77 working models from 540 parts.

Set 6

Set 7

Set 7 — A magnificent windmill is one of the 92 wonderful models in this set. There are 680 individual parts.

A twin rotor helicopter. A fine example of how life-like the Meccano system can be.

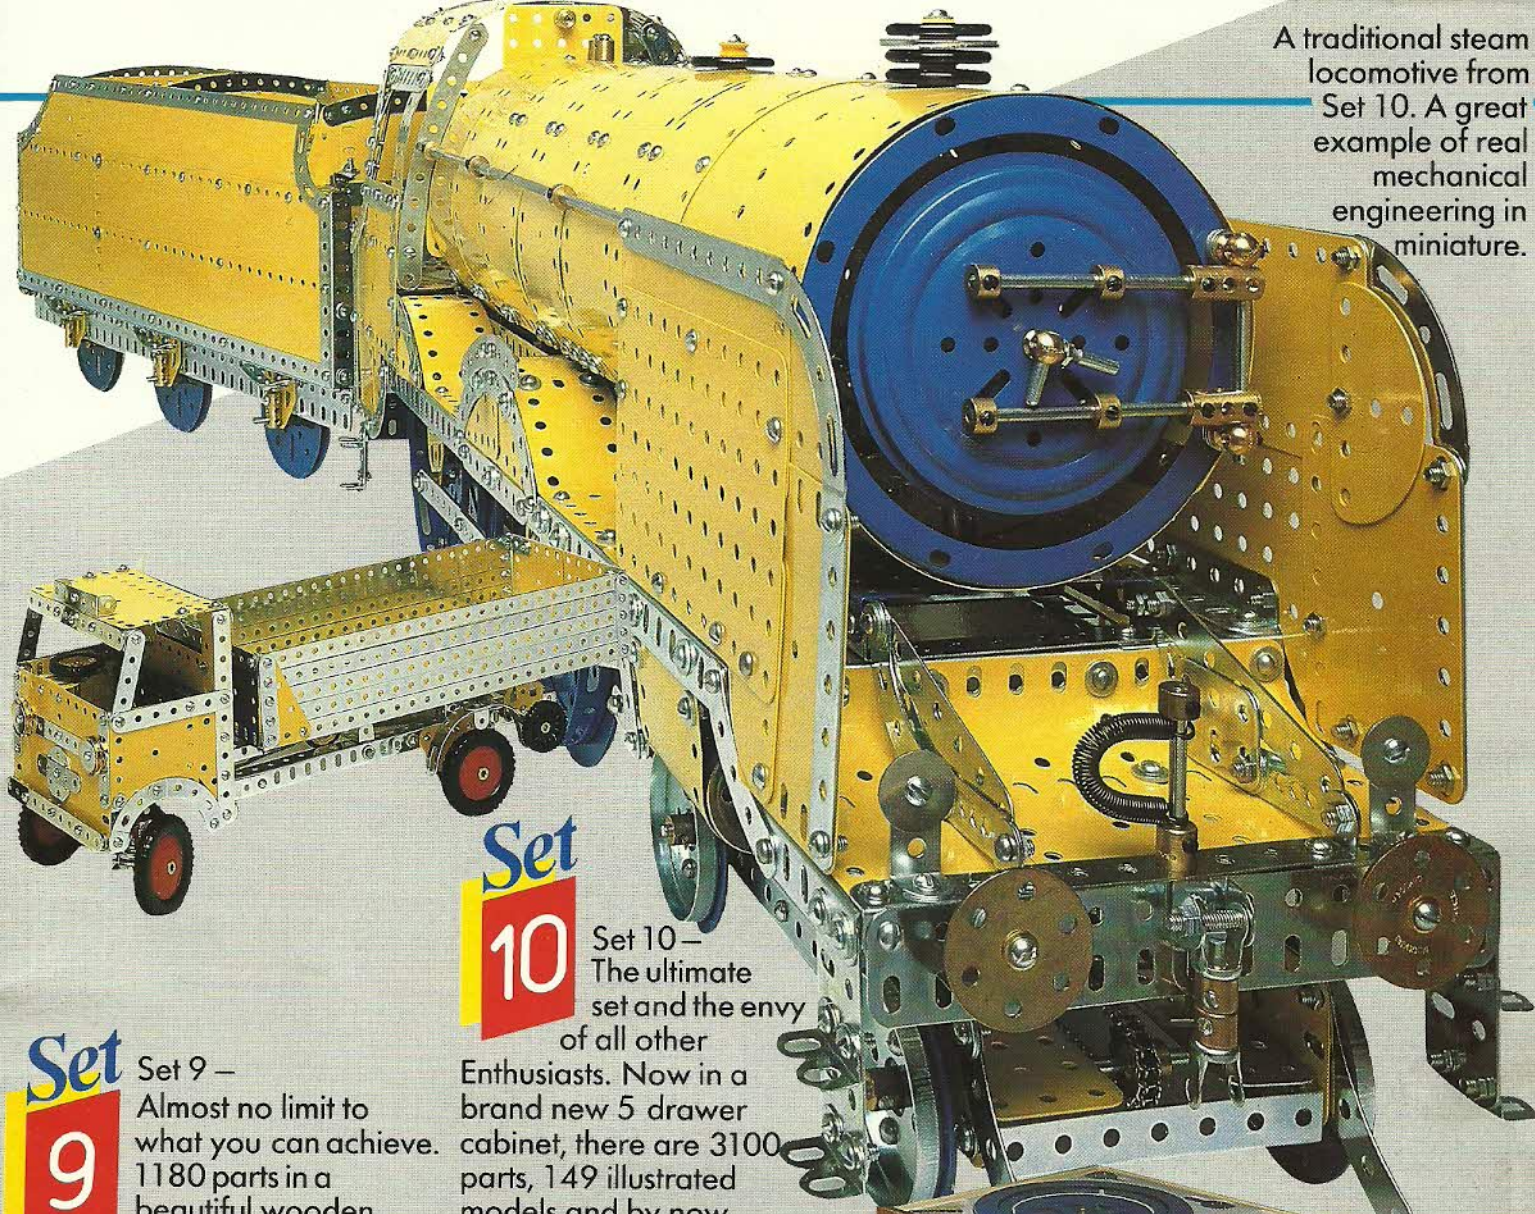

Set 8

Set 8 — A large Ferris Wheel is possible here along with 107 other great designs. 800 parts make up this set.

A traditional steam locomotive from Set 10. A great example of real mechanical engineering in miniature.

Set 10

Set 10 – The ultimate set and the envy of all other Enthusiasts. Now in a brand new 5 drawer cabinet, there are 3100 parts, 149 illustrated models and by now whatever the Meccano Enthusiast decides to build.

Set 9

Set 9 – Almost no limit to what you can achieve. 1180 parts in a beautiful wooden case. There are 124 illustrated models.

MECCANO

NB. Separate electric motors should be purchased with the Enthusiast series – see overleaf.

MECCANO

Accessories AND SPARES

For all Meccano Model Makers – a great range of supplementary sets, motors and spare parts.

Supplementary Sets (9X not illustrated)
A truly economic way of building up on your Meccano collection. Takes each of the Sets 1 to 9 to the next largest set e.g. Set 2 + 2X = Set 3.

Mechanisms Set
A special set for the engineer in mind. A range of gears and other parts to make your models even more realistic. For all owners of sets 1–8.

***The Motor M** – A 12 volt electric motor for the advanced Model Builder. The integral gearbox offers six variable speeds! Applicable to all sets this compact motor can be battery or transformer driven.

***The Motor Set MO** – A single speed 6 volt electric motor with stop start and reversing capability. Can be adapted to any model within the Meccano range. Battery holder and other parts also included.

Spare Parts
A complete range of spare parts enables the Meccano model maker to add to their sets on a selective basis. Each of the 338 separate Meccano parts are available.

NEW

***The Motor MR** – a compact and powerful 9-12 volt single speed motor with stop, start and reversing capability. Battery or transformer driven.
*Batteries not included
